Community psychiatric help

Customer Objectives

Our client wanted a website that showcases their help offers, mission, partners, job offers, volunteering activities, press inquiries, and other services they are providing. A website that is easy to navigate and appeal to medical tourists from across the world.

The solution we offered

According to our client requirement, we proposed a TYPO3 CMS website. CMS solution will allow the management to upload updated contents, pictures.

- We designed and developed a responsive and dynamic website that will help the client to access the website from any device.
- We designed an article portal for publishing lasting articles on their web page.
- We designed separate web pages for help offers, employer, communication, and cooperation.

Key Features

- Contact form
